Assessing Policies on Choice; 12 The market and school-based management in England; 13 The educational policies of New Labour and the old problem of inequality; References
Sommario/riassunto	Geoffrey Walford tackles one of the perennial issues in education policy, namely the inter-relationship of markets and equity. His discussion synthesises research findings (his own in the context of others) from over a decade examining the triangle between (i) theory,

(ii) policy (both current and recent) and (iii) practice.
