Descrizione fisica	1 online resource (317 p.)
Disciplina	150.195 155.4
Soggetti	Child analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Copy Right; ACKNOWLEDGEMENTS; ABOUT THE EDITORS AND CONTRIBUTORS; PREFACE; INTRODUCTION; CHAPTER ONE: Françoise Dolto: a biography; CHAPTER TWO: Françoise Dolto's contribution to neonatology; CHAPTER THREE: Childhood psychosis; CHAPTER FOUR: Seeing the bigger picture; CHAPTER FIVE: The unconscious image of the body; CHAPTER SIX: Gendering the libido: Françoise Dolto and female sexuality; CHAPTER SEVEN: Homosexuality in women; CHAPTER EIGHT: La Maison Verte: a place for words. Personal reflections on working with Françoise Dolto CHAPTER NINE: La Casa Verde: Speech, listening, welcoming in CHAPTER TEN: Desire, Dire, Dieu, and Dolto; APPENDIX I: Chronology of the life of Françoise Dolto
Sommario/riassunto	During her lifetime Françoise Dolto revolutionized the psychoanalytic understanding of childhood. As an early pioneer, she emphasized that the child is to be recognized from birth as a person. As a gifted and innovative clinician, Dolto developed her ideas about the unconscious image of the body. An image that is unique to each individual and

linked to both a person's history and narcissism, rather than their physicality. It is the symbolic incarnation of a person's desires. Dolto began her career as a member of the IPA, was admired by Winnicott, close to Lacan and influenced by Morgenstern.

Sommario/riassunto	Climate change is one of the major challenges of modern times. Its impacts are manifold and vary from sea level rise (especially relevant to those living in coastal areas), to the increased frequency of extreme events such as cyclones and storm surges, which not only poses problems to property and infrastructure, but also to human health. Climate change is also associated with damages to the physical and

natural environment, as well as to biodiversity. According to the 5th Assessment Report produced by the Inter-Governmental Panel on Climate Change (IPCC), many geographical regions across the world are moderately or highly vulnerable to climate change, whose impacts may be further exacerbated by other human-induced pressures. The above state of affairs illustrates the need for a better and more holistic understanding of how climate change affects countries and regions on the one hand, but also on how the many problems it causes may be managed on the other, vis-a-vis a better ability to adapt. There is also a perceived need to showcase successful examples of how to duly address and manage the many social, economic and political problems posed by climate change around the world, in order to replicate and even upscale the successful ones. It is against this background that the Handbook of Climate Change Management has been produced. It contains papers prepared by scholars, social movements, practitioners and members of governmental agencies, undertaking research and/or executing climate change projects, and working with communities across all geographical regions. The Handbook focuses on "Research, Leadership, Transformation", meaning that it serves the purpose of showcasing the role these key areas play in respect of applied research, field projects and best practices to foster climate change adaptation worldwide.
