15 Is China's development success transferable?16 China's contribution to the field of economics: A laboratory for induced institutional change; Index

Sommario/riassunto

Between 1978 and 2006, GDP growth in China maintained an annual average rate of 9.7%, meaning the Chinese economy increased by more than twelve times. This was achieved with quite unorthodox approaches to reform and development as China has adopted a gradualist approach to adopting key institutions, as well as modifying and experimenting with traditional recipes for economic growth.?This collection brings together key researchers in the field from Asia, US, Europe and Australia to discuss how China has managed to push forward reforms in the face of political resistance, how th
