Rosenzweig -- International migration and development / Gordon H. Hanson -- The cliff at the border / Lant Pritchett.

Sommario/riassunto

This book is a compilation of a series of "state of the art" papers on topics related to equity and growth. As inputs to its final report (The Growth Report)\, the Commission on Growth and Development took stock of the current state of knowledge and understanding of various sectors/issues that have an impact on economic growth, including equity, education, health, leadership and others. The following questions are discussed in the book: . - What has been the evolution of poverty and equity during the recent globalizing decades?. - How have poor countries fared on the Millennium Development Goal
