Sommario/riassunto	Although human trafficking has a long and ignoble history, it is only recently that trafficking has become a major political issue for states and the international community and the subject of detailed international rules. Anne T. Gallagher calls on her direct experience working within the United Nations to chart the development of new international laws on this issue. She links these rules to the

international law of state responsibility as well as key norms of international human rights law, transnational criminal law, refugee law and international criminal law, in the process identifying and explaining the major legal obligations of states with respect to preventing trafficking, protecting and supporting victims, and prosecuting perpetrators. This book is a groundbreaking work: a unique and valuable resource for policymakers, advocates, practitioners and scholars working in this controversial and important field.
