Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Transportation Services Index (TSI) and its characteristics / Kajal Lahiri -- Coincident Index of the transportation sector and its linkages to the economy / Kajal Lahiri -- Leading indicators for the U.S. transportation sector / Kajal Lahiri -- TSI as a part of the Coincident Indicators System / Kajal Lahiri -- Transportation indicators : summary and concluding remarks / Kajal Lahiri.
Sommario/riassunto	Transportation Indicators and Business Cycles recognises the important role the transportation sector plays in business cycle propagation and develops indicators for this sector to identify its current state, and predict its future. The reference cycle is defined, including business and growth cycles, for this sector over the period from 1979 using both the conventional National Bureau of Economic Research (NBER) method and modern time series models. A one-to-one correspondence between cycles in the transportation sector and those in the aggregate economy is found. It also constructs an index of leading indicators for the transportation sector using rigorous statistical procedures, and

performs well as a forecasting tool.
