                      Integrated Training Systems; Notes; About the Authors
                      Selected Bibliography Index

   Sommario/riassunto This will be the first book to attempt to take a 'holistic' approach to
                      security in the Commons (outer space, the atmosphere, the oceans,
                      cyberspace, etc) in that it examines in detail each domain of the
                      commons, identifying and assessing the current and future threats to
                      free international access to the domain.
