#### Sommario/riassunto

The essays in this volume concentrate on imperial conflict. Until recently, most historians of empire have concerned themselves with economic issues. More recently, scholarship has turned to social and cultural aspects of Empire. The role of the military, however, continues to be largely ignored. Historians have traditionally viewed the military as an arm of the civil power, an institution which did not create policy but faithfully obeyed the directives given to it. These essays show that indeed the military thought for itself: its officers made policy, introduced new strategies and tactics, and utilized the services of local settlers and indigenes to pursue the interests of empire, and the rank and file informed ideas in Great Britain concerning Africa and Africans. Contributors are Edward M. Spiers, Ian F.W. Beckett, Bill Nasson, John Laband, Paul Thompson, Fransjohan Pretorius, Tim Stapleton, Ian van der Waag, James Thomas, Jeffrey Meriwether, and Bruce Vandervort.

Sommario/riassunto

This book constitutes the thoroughly refereed and extended post-workshop proceedings of the 12th Annual ERCIM International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2007, held in Rocquencourt, France, in June 2007. The 10 revised full papers presented were carefully reviewed and selected from 16 initial submissions. The papers address all aspects of constraint and logic programming, including foundational issues, implementation techniques, new applications as well as teaching issues. Particular emphasis is placed on assessing the current state of the art and identifying future directions.
