Sommario/riassunto	According to the National Headache Foundation, over 45 million Americans suffer from chronic, recurring headaches (28 million from migraine alone). Headache is the most common complaint for which people see neurologists. Headache can impede job functioning and undermine one's quality of life if not managed effectively. Despite this, research that would help in the care and management of headache

patients is sadly lacking. The Jefferson Headache Manual is a practical guide for the practitioner seeking assistance in diagnosing and treating headache patients. Written by the experts at one of the f
