Sommarioriassunto

The authors in this edited volume reflect on their experiences with culturally relevant pedagogy-as students, as teachers, as researchers-and how these experiences were often at odds with their backgrounds and/or expectations.

Sommario/riassunto

Despite great progress in diagnosis and treatment, craniocerebral trauma remains the principal cause of death in persons under 45 and the principal cause of death in children under fifteen years of age. This book offers a comprehensive presentation of the theme of craniocerebral trauma, from pre-clinical issues to rehabilitation. Trotz aller Fortschritte in Diagnostik und Therapie ist das Schädelhirntrauma noch immer die Haupttodesursache der unter 45-Jährigen und die Haupttodesursache von Kindern unter fünfzehn Jahren. Das vorliegende Buch bietet eine umfassende Darstellung der Thematik von der Präklinik bis zur Rehabilitation.
