Sommario/riassunto

The book is meant to elucidate the concept of justice and its dictates in the various fields of life as well as the implications of injustice. Human rights, the rule of law and democracy are the offspring of justice. The Judiciary is the agent of justice, the persona of justice, trusted to uphold justice in the ever-changing circumstances of life. Of old, justice was perceived as encompassing all virtues. It has a pananthropic character charting the way for symmetry in life and the ascent of man. The book has a lego-philosophical character of interest to every anthropological and societal discipline.
