

1. Record Nr.	UNINA9910785571003321
Titolo	Case studies in neuroanesthesia and neurocritical care // edited by George A. Mashour, Ehab Farag [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2011
ISBN	1-107-21428-9 0-511-85290-8 1-282-97651-6 9786612976513 0-511-93172-7 0-511-93307-X 0-511-92787-8 0-511-92533-6 0-511-99742-6 0-511-93038-0
Descrizione fisica	1 online resource (xvii, 342 pages) : digital, PDF file(s)
Collana	Cambridge medicine Case studies in neuroanesthesia and neurocritical care
Disciplina	617.9/6748
Soggetti	Anesthesia in neurology Nervous system - Surgery Neurological intensive care
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. Craniotomy. Supratentorial craniotomy -- Posterior fossa craniotomy -- pt. II. Vascular procedures. Aneurysm clipping -- Aneurysm coiling -- Arteriovenous malformation -- Carotid endarterectomy -- pt. III. Functional neurosurgery -- pt. IV. Spine surgery. Spinal cord injury -- Complex spine -- Cervical spine and airway issues -- V. Neuroendocrine -- pt. VI. Pediatric neuroanesthesia -- pt. VII. Neurologic sequelae in other patient populations. Pregnancy -- Miscellaneous -- pt. VIII. General topics in neurocritical -- pt. IX. Subarachnoid hemorrhage -- X. Stroke -- pt. XI. Intraparenchymal hemorrhage -- pt. XII. Traumatic brain injury -- pt. XIII. Seizures --

XIV. Neuromuscular disease -- pt. XV. End-of-life issues.

Sommario/riassunto

The anesthetic considerations and procedures involved in the perioperative care of the neurosurgical patient are among the most complex in anesthesiology. The practice of neurosurgery and neuroanesthesiology encompasses a wide range of cases, from major spine surgery, to aneurysm clipping and awake craniotomy. *Case Studies in Neuroanesthesia and Neurocritical Care* provides a comprehensive view of real-world clinical practice. It contains over 90 case presentations with accompanying focussed discussions, covering the broad range of procedures and monitoring protocols involved in the care of the neurosurgical patient, including preoperative and postoperative care. The book is illustrated throughout with practical algorithms, useful tables and examples of neuroimaging. Written by leading neuroanesthesiologists, neurologists, neuroradiologists and neurosurgeons from the University of Michigan Medical School and the Cleveland Clinic, these clear, concise cases are an excellent way to prepare for specific surgical cases or to aid study for both written and oral board examinations.
