Sommario/riassunto	Although it is often simplified as an ""ethnic conflict"" in popular media, the current crisis in Darfur can only be superficially defined across ethnic lines. Any long-term solution to the conflict must also address the underlying social and environmental influences such as changing

resource dynamics, expanding poverty, lack of infrastructure, and political corruption, which have brought the crisis to a head. This project diverges from previous studies by examining how the dynamic interaction between the environment, local governance, and national policy in Sudan has resulted in the Darfur
