Sommario/riassunto	The efficiency, safety, and soundness of financial markets depend on the operation of core infrastructure--exchanges, central counter-parties, and central securities depositories. How these institutions are governed critically affects their performance. Yet, despite their importance, there is little certainty, still less a global consensus, about their governance. Running the World's Markets examines how markets are, and should be, run. Utilizing a wide variety of arguments and examples from throughout the world, Ruben Lee identifies and

evaluates the similarities and differences between exchanges, central counter-parties, and central securities depositories. Drawing on knowledge and experience from various disciplines, including business, economics, finance, law, politics, and regulation, Lee employs a range of methodologies to tackle different goals. Conceptual analysis is used to examine theoretical issues, survey evidence to describe key aspects of how market infrastructure institutions are governed and regulated globally, and case studies to detail the particular situations and decisions at specific institutions. The combination of these approaches provides a unique and rich foundation for evaluating the complex issues raised. Lee analyzes efficient forms of governance, how regulatory powers should be allocated, and whether regulatory intervention in governance is desirable. He presents guidelines for identifying the optimal governance model for any market infrastructure institution within the context of its specific environment. Running the World's Markets provides a definitive and peerless reference for how to govern and regulate financial markets.

Sommario/riassunto

The Greek biographer and philosopher Plutarch of Chaeronea (c. 45-125 AD) makes a fascinating case-study for reception studies not least because of his uniquely extensive and diverse afterlife. Brill's *Companion to the Reception of Plutarch* offers the first comprehensive analysis of Plutarch's rich reception history from the Roman Imperial period through Late Antiquity and Byzantium to the Renaissance, Enlightenment and the modern era. The thirty-seven chapters that make up this volume, written by a remarkable line-up of experts, explore the appreciation, contestation and creative appropriation of Plutarch himself, his thought and work in the history of literature

across various cultures and intellectual traditions in Europe, America,
North Africa, and the Middle East.
