

1. Record Nr.	UNINA9910785592303321
Titolo	Encyclopedia of biological invasions [[electronic resource] /] edited by Daniel Simberloff and Marcel Rejmanek
Pubbl/distr/stampa	Berkeley, : University of California Press, 2011
ISBN	1-283-33188-8 1-78034-887-8 9786613331885 0-520-94843-2
Descrizione fisica	1 online resource (790 p.)
Collana	Encyclopedias of the natural world ; ; 3
Altri autori (Persone)	RejmanekMarcel SimberloffDaniel
Disciplina	578.6/2
Soggetti	Biology Introduced organisms
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

This pioneering encyclopedia illuminates a topic at the forefront of global ecology-biological invasions, or organisms that come to live in the wrong place. Written by leading scientists from around the world, Encyclopedia of Biological Invasions addresses all aspects of this subject at a global level-including invasions by animals, plants, fungi, and bacteria-in succinct, alphabetically arranged articles. Scientifically uncompromising, yet clearly written and free of jargon, the volume encompasses fields of study including biology, demography, geography, ecology, evolution, sociology, and natural history. Featuring many cross-references, suggestions for further reading, illustrations, an appendix of the world's worst 100 invasive species, a glossary, and more, this is an essential reference for anyone who needs up-to-date information on this important topic. Encyclopedia of Biological Invasions features articles on:

- Well-known invasive species such as the zebra mussel, chestnut blight, cheatgrass, gypsy moth, Nile perch, giant African snail, and Norway rat
- Regions with especially large numbers of introduced species including the Great Lakes,

Mediterranean Sea, Hawaiian Islands, Australia, and New Zealand. • Conservation, ecological, economic, and human and animal health impacts of invasions around the world • The processes and pathways involved in invasion • Management of introduced species
