

1. Record Nr.	UNINA9910785596603321
Titolo	Artificial intelligence research and development [[electronic resource]] : proceedings of the 13th International Conference of the Catalan Association for Artificial Intelligence / / edited by Rene Alquezar, Antonio Moreno, and Josep Aguilar
Pubbl/distr/stampa	Amsterdam, : IOS Press, 2010
ISBN	6612956208 1-282-95620-5 9786612956201 1-60750-643-2
Descrizione fisica	1 online resource (360 p.)
Collana	Frontiers in artificial intelligence and applications, , 0922-6389 ;vv. 220
Altri autori (Persone)	AlquezarRene MorenoAntonio AguilarJosep
Disciplina	006.3
Soggetti	Artificial intelligence - Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Title page; Preface; Conference Organization; Contents; Invited Talks; Agents and Multi-Agents Systems; AI Real-World Applications; Data Mining, Machine Learning and Soft Computing; Logics, Constraint Satisfaction and Reasoning; Robotics, Vision and Perception; Subject Index; Author Index
Sommario/riassunto	Artificial Intelligence (AI) is one of the hottest areas of research with hundreds of potentially real life applications and one of the disciplines that is most intertwined with all sorts of fields related to human experience.A wide range of disciplines, sectors and technologies could benefit from the results of AI breakthroughs; from robotics to search engines; healthcare or environment; screening, monitoring or supervision techniques. This book compiles the 33 accepted papers presented at the 13th International Conference of the Catalan Association for Artificial Intelligence.Although most o
