Sommario/riassunto

Zeus, Medusa, Hercules, Aphrodite. Did you know that these and other dynamic deities, heroes, and monsters of Greek and Roman mythology live on in the names of trees and flowers? Some grow in your local woodlands or right in your own backyard garden. In this delightful book, botanist Peter Bernhardt reveals the rich history and mythology that underlie the origins of many scientific plant names. Unlike other books about botanical taxonomy that take the form of heavy and intimidating lexicons, Bernhardt's account comes together in a series of interlocking stories. Each chapter opens with a short version of a classical myth, then links the tale to plant names, showing how each plant "resembles" its mythological counterpart with regard to its history, anatomy, life cycle, and conservation. You will learn, for example, that as our garden acanthus wears nasty spines along its leaf margins, it is named for the nymph who scratched the face of Apollo. The shape-shifting god, Proteus, gives his name to a whole family of shrubs and trees that produce colorful flowering branches in an astonishing number of sizes and shapes. Amateur and professional gardeners, high school teachers and professors of biology, botanists and conservationists alike will appreciate this book's entertaining and informative entry to the otherwise daunting field of botanical names. Engaging, witty, and memorable, *Gods and Goddesses in the Garden* transcends the genre of natural history and makes taxonomy a topic equally at home in the classroom and at cocktail parties.

the inequality of economic development in Europe in the later Middle Ages -- Problems of the growth of the national economy of Central-Eastern Europe in the late Middle Ages -- East and West Europe in the 13th-16th centuries : confrontation of social and economic structures -- Economic and political divisions in medieval and early modern Europe -- Eastern Europe and the countries of the Iberian Peninsula : parallels and contrasts -- The social and economic stability of the Western Sudan in the Middle Ages -- The Western Sudan in the Middle Ages : underdevelopment in the empires of the Western Sudan Hopkins-Maowist debate -- Social and economic life in Timur's empire -- New Saray, capital of the Golden Horde -- The foundations of European expansion in Africa in the 16th century : Europe, Maghreb and Western Sudan -- Portuguese expansion in Africa and European economy at the turn of the 15th century -- Gulf of Guinea countries in the 15th and early 16th century.

---

Sommario/riassunto

\This collection of essays is most welcome. The main articles of Marian Maowist are collected together (and in many cases translated into English) for the first time. Maowist, who is one of the major economic historians of the twentieth century, is also a much neglected one. Of the eighteen articles here, only five were published in English-language journals that are widely read by historians and social scientists, and even these journals are primarily read by economic historians. So most scholars have been missing out on one of the most fertile and cultivated minds who have written on the central issue of our times - the wide and widening gulf between the core and the periphery, the North and the South, western and eastern Europe\ (Immanuel Wallerstein).
