| Soggetti | Ants - Fiji |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | Front matter -- Contents -- List of Plates -- Abstract -- Acknowledgments -- Introduction -- Methods -- Taxonomic synopsis of the Fijian ant Fauna -- Species plates -- Literature Cited -- Appendix A. Collection localities -- Appendix B. Checklist of the ants of Fiji |
| Sommario/riassunto | The ant fauna of the Fijian archipelago is a diverse assemblage of endemic radiations, pan-Pacific species, and exotics introduced from around the world. The Ants of Fiji describes the entire Fijian ant fauna, and includes the results of a recently completed archipelago-wide biodiversity inventory. A total of 187 ant species representing 43 genera are recognized here with an illustrated key to genera, synopses of each species, keys to species of all genera, and a species list. The work is heavily illustrated with specimen images, distribution maps, and habitat elevation charts. |
