The Movement -- Notes -- Index In this third volume of his award-winning American Crisis series, James Sommario/riassunto Gustave Speth makes his boldest and most ambitious contribution yet. He looks unsparingly at the sea of troubles in which the United States now finds itself, charts a course through the discouragement and despair commonly felt today, and envisions what he calls America the Possible, an attractive and plausible future that we can still realize. The book identifies a dozen features of the American political economy-the country's basic operating system-where transformative change is essential. It spells out the specific changes that are needed to move

> toward a new political economy-one in which the true priority is to sustain people and planet. Supported by a compelling ";theory of change"; that explains how system change can come to America, the book also presents a vision of political, social, and economic life in a

renewed America. Speth envisions a future that will be well worth fighting for. In short, this is a book about the American future and the strong possibility that we yet have it in ourselves to use our freedom and our democracy in powerful ways to create something fine, a reborn America, for our children and grandchildren.
