1. Record Nr.   UNINA9910785820403321

   Titolo   Jordan algebras [[electronic resource]] : proceedings of the conference
                        held in Oberwolfach, Germany, August 9-15, 1992 / / edited by
                        Wilhelm Kaup, Kevin McCrimmon, Holger P. Petersson

   Pubbl/distr/stampa   Berlin ; ; New York, : W. de Gruyter, 1994

   ISBN   3-11-087811-9

   Edizione   [Reprint 2010]

   Descrizione fisica   1 online resource (352 p.)

   Collana   De Gruyter Proceedings in Mathematics

   Classificazione   SD 1992

   Altri autori (Persone) KaupWilhelm <1937->
                        McCrimmonKevin <1941->
                        PeterssonHolger P. <1939->

   Disciplina   512/.24

   Soggetti   Jordan algebras
                        Algebra

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   "Conference on Jordan Algebras held at Mathematisches
                        Forschungsinstitut, Oberwolfach"--Pref.

   Nota di bibliografia Includes bibliographical references.

   Nota di contenuto   Front matter -- Structurable algebras and the construction of simple
                        Lie algebras / Allison, B. N. -- Algebraic systems in differential
                        geometry / Dorfmeister, J. -- Fonctions spéciales sur une algèbre de
                        Jordan / Faraut, J. -- Geometry and algebraic structures / Faulkner, J. R.
                        -- Bounded symmetric domains and the JB*-triple structure in physics
                        / Friedman, Y. -- Recent results on finiteness conditions in Jordan pairs
                        / Loos, O. -- Jordan structures in analysis / Palacios, A. Rodriguez --
                        Max Koecher's work on Jordan algebras / Petersson, H. P. -- Albert
                        algebras / Petersson, H. P. / Racine, M. L. -- Structure of JB*-triples /
                        Russo, B. -- The classification of the simple Lie algebras over
                        algebraically closed fields with positive characteristic / Strade, H. --
                        Jordan algebras, complex analysis and quantization / Upmeier, H. --
                        Algebraic structures and differential equations / Walcher, S. -- On
                        linear groups and Lie algebras over arbitrary rings / Zelmanov, E. --
                        List of Contributors -- List of Participants
