	Sommario/riassunto	Early Ibd Theology presents the critical edition of six Arabic theological texts recently discovered in two manuscripts in Mzb in Algeria dating from the middle of the 8th century. The texts were sent by their author, the prominent Kfan Ibd kalm theologian 'Abd Allh born Yazd al-Fazr to North Africa where he had a large following in the Ibd community later known as the Nukkr. They constitute the

earliest extant body of Muslim kalm theology and are vital for the study of the initial development of rational theology in Islam. The sophisticated treatment of the divine attributes in these texts indicates that this subject developed considerably earlier in Islamic theology than previously accepted in modern scholarship.
