Sommario/riassunto

Revitalization of religious and cultural traditions is taking place in nearly all contemporary Asian societies, as is shown in Faith in the Future: Understanding the Revitalization of Religions and Cultural Traditions in Asia . Revitalization is not unique to Asia, it is one of the most significant new global trends in religion and society. While they are a response to globalization and rapid change, revitalization movements are not backward looking but represent a struggle by local people for their right to determine their own future in a changing world, while also reflecting their desire to find an appropriate place and status for themselves within a global context which they take for granted. The volume provides a comparative analysis of the key features and aspirations of revitalization movements and assesses their scope for shaping the future trajectories of societies in all parts of the world.
