Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. Forms of states and environmental protection -- pt. II. Case studies : the management and protection of water resources.
Sommario/riassunto	The book describes and analyses how environmental issues are regulated in several federal, regional and unitary systems and in the European Union. The comparative analysis reveals common trends towards a multi-layered environmental governance, cross-cutting traditional distinctions among different state models. In the second part, the case study of the management and protection of water resources is selected and analysed in the same legal systems. Disaggregating environmental protection into more specific competence fields allows trends and challenges to be tested The book casts light on the relationship between the state models as to the division of powers and environmental governance. It develops theoretical and practical foundations of contemporary, multi-level

environmental law and challenges consolidated approaches in federal studies.
