

1. Record Nr.	UNINA9910785940503321
Titolo	Groundwater quality sustainability // editors, Piotr Maloszewski, Stanislaw Witczak & Grzegorz Malina
Pubbl/distr/stampa	Leiden, The Netherlands ; ; Boca Raton : , : CRC Press, , 2013
ISBN	0-429-21728-5 1-136-48950-9 0-203-13765-5
Descrizione fisica	1 online resource (364 p.)
Collana	Selected papers on hydrogeology ; ; 17
Altri autori (Persone)	MaloszewskiPiotr WitczakStanislaw MalinaGrzegorz
Disciplina	628.1/14
Soggetti	Groundwater - Quality Groundwater - Pollution Groundwater recharge
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	A Balkema book.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Groundwater quality -- pt. 2. Groundwater management -- pt. 3. Groundwater - surface water interaction -- pt. 4. Regional groundwater problems -- pt. 5. Data processing & modelling.
Sommario/riassunto	Sustainable groundwater development requires knowledge of the appropriate recharge and transport-processes. This is a prerequisite to understanding: (i) groundwater resources and their availability, and (ii) the dependence between groundwater and the environment. Conceptual understanding of groundwater flow at both temporal and spatial scales (local and regional) is essential for management that will support engineering, industry, agriculture, ecology, and all environmentally related issues. This book has been prepared for scientists, researchers, students, engineers, water resources
