Sommario/riassunto	In this book, Bleda During offers an archaeological analysis of Asia Minor, the area equated with much of modern-day Turkey, from 20,000 to 2,000 BC. During this period human societies moved from small-scale hunter-gatherer groups to complex and hierarchical communities with economies based on agriculture and industry. Dr

During traces the spread of the Neolithic way of life, which ultimately reached across Eurasia, and the emergence of key human developments, including the domestication of animals, metallurgy, fortified towns and long-distance trading networks. Situated at the junction between Europe and Asia, Asia Minor has often been perceived as a bridge for the movement of technologies and ideas. By contrast, this book argues that cultural developments followed a distinctive trajectory in Asia Minor from as early as 9,000 BC.

Sommario/riassunto	Professor Juan Manuel Barrientos prefers footsteps to footnotes. Fighting a hangover, he manages to keep his appointment to lead a group of students on a walking lecture among the historic buildings of downtown Mexico City. When the students fail to show up, however, he undertakes a solo tour that includes more cantinas than cathedrals. Unable to resist either alcohol itself or the introspection it inspires, Professor Barrientos muddles his personal past with his historic surroundings, setting up an inevitable conclusion in the very center of Mexico City. First published in Mexico in the late 1990s, And Let the Earth Tremble at Its Centers was immediately lauded as a contemporary masterpiece in the long tradition of literary portraits of Mexico City. It is a book worthy of its dramatic title, which is drawn from a line in the Mexican national anthem. Gonzalo Celorio first earned a place among the leading figures of Mexican letters for his scholarship and criticism, and careful readers will recognize a scholar's attention to accuracy within the novel's dyspeptic descriptions of Mexico City. The places described are indeed real (this edition includes a map that marks those visited in the story), though a few have since closed or been put to new uses. Dick Gerdes's elegant translation now preserves them all for a

new audience.
