Sommario/riassunto	At a time when social and political reality seems to move away from the practice of cosmopolitanism, whilst being in serious need of a new international framework to regulate global interaction, what are the new definitions and practices of cosmopolitanism? Including contributions from leading figures across the humanities and social

sciences, After Cosmopolitanism takes up this question as its central challenge. Its core argument is the idea that our globalised condition forms the heart of contemporary cosmopolitan claims, which do not refer to a transcendental ideal, but are rather immanent

Sommario/riassunto

"In her bestselling books *Blue Gold* and *Blue Covenant*, world-renowned water activist Maude Barlow exposed the battle for ownership of our dwindling water supply and the emergence of an international, grassroots-led movement to reclaim water as a public good. Since then, the United Nations has recognized access to water as a basic human right-but there is still much work to be done to stem this growing crisis. In this major new book, Barlow draws on her extensive experience and insight to lay out a set of key principles that show the way forward to what she calls a "water-secure and water-just world." Not only does she reveal the powerful players even now impeding the recognition of the human right to water, she argues that water must not become a commodity to be bought and sold on the open market. Focusing on solutions, she includes stories of struggle and resistance from marginalized communities, as well as government policies that work for both people and the planet. At a time when climate change has moved to the top of the national agenda and when the stage is being set for unprecedented drought, mass starvation, and the migration of millions of refugees in search of water, *Blue Future* is an urgent call to preserve our most valuable resource for generations to come.
