Sommario/riassunto	Dynamic individuals, one man or one woman at a time, frequently have played a role in slowing or hastening the forces that make history. Prof. Underhill shows the personalities, strengths and weaknesses of six men whose momentous decisions helped shape society. High school and college students may have heard of Ignatius Donnelly, Theodore Roosevelt, Eugene Debs, Robert LaFollette, George Norris and Henry Agard Wallace; this informal history brings them to life and shows how they split from their friends and party affiliations to advocate ideas that seemed wild at the time but which later became

### Sommario/riassunto

In the past two decades, complexity thinking has emerged as an important theoretical response to the limitations of orthodox ways of understanding educational phenomena. Complexity provides ways of understanding that embrace uncertainty, non-linearity and the inevitable 'messiness' that is inherent in educational settings, paying attention to the ways in which the whole is greater than the sum of its parts. This is the first book to focus on complexity thinking in the context of physical education, enabling fresh ways of thinking about research, teaching, curriculum and learning.
