

1. Record Nr.	UNINA9910786126103321
Autore	Pick Lubos
Titolo	Function spaces [[electronic resource]] . Volume 1 // Lubos Pick ... [et al.]
Pubbl/distr/stampa	Berlin, : De Gruyter, 2013
ISBN	3-11-025042-X
Edizione	[2nd rev. and extended ed.]
Descrizione fisica	1 online resource (495 p.)
Collana	De Gruyter series in nonlinear analysis and applications, , 0941-813X ; ; 14
Disciplina	515.7
Soggetti	Ideal spaces Sobolev spaces Function spaces
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Preface -- Contents -- Chapter 1. Preliminaries -- Chapter 2. Spaces of smooth functions -- Chapter 3. Lebesgue spaces -- Chapter 4. Orlicz spaces -- Chapter 5. Morrey and Campanato spaces -- Chapter 6. Banach function spaces -- Chapter 7. Rearrangement-invariant spaces -- Chapter 8. Lorentz spaces -- Chapter 9. Generalized Lorentz-Zygmund spaces -- Chapter 10. Classical Lorentz spaces -- Chapter 11. Variable-exponent Lebesgue spaces -- Bibliography -- Index
Sommario/riassunto	This is the first part of the second revised and extended edition of the well established book "Function Spaces" by Alois Kufner, Oldich John, and Svatopluk Fuík. Like the first edition this monograph is an introduction to function spaces defined in terms of differentiability and integrability classes. It provides a catalogue of various spaces and benefits as a handbook for those who use function spaces in their research or lecture courses. This first volume is devoted to the study of function spaces, based on intrinsic properties of a function such as its size, continuity, smoothness, various forms of a control over the mean oscillation, and so on. The second volume will be dedicated to the study of function spaces of Sobolev type, in which the key notion is the weak derivative of a function of several variables.
