Sommario/riassunto	Surviving with Dignity focuses on the lived experience of two generations of migrant Hausa men in Niamey, Niger's capital city, set in a larger social matrix of national and global transformations. Their extraordinary ability to maintain their dignity despite their daily struggles to eke out a living in the face of structural violence and unrelenting hardship reveals a tremendously powerful will and capacity to keep going.

Soggetti	Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This Special Issue presents an in-depth analysis of transport research commissioned by the UK Department for International Development under the High Volume Transport Programme (2017-2023). The analysis done in the period 2018-2019 contributes to the UK response to improving transport in the low-income countries in Africa and South Asia. As a result, key priorities have been identified for applied research in 2020 to make road, rail and urban transport more efficient and affordable, and all transport greener, safer and more inclusive for all users. This applied research is a vital link in making transport a sustainable lifeline for people in low-income countries, because transport gives farmers and manufacturers access to domestic and international markets and people in rural and urban areas access to schools and health services.</p>
