| Sommario/riassunto | Globalization, Technological Change, and Public Education documents the dramatic changes taking place in public education through the incorporation of new information technologies. These additions to the public school environment have generally been seen as enabling tools to help students and nations compete in the global marketplace. Yet a closer look at the interplay of technological change and organizational restructuring suggests the emergence of new, less promising power relations. Through detailed ethnographic research and interviews in the Los Angeles public school system, To |
