

1. Record Nr.	UNINA9910786225803321
Titolo	Carotenoids and vitamin A in translational medicine // edited by Olaf Sommerburg, Werner Siems, and Klaus Kraemer
Pubbl/distr/stampa	Boca Raton, Fla : , : CRC Press/Taylor & Francis Group, , 2013
ISBN	0-429-10692-0 1-4398-5527-7
Descrizione fisica	1 online resource (431 p.)
Collana	Oxidative stress and disease
Altri autori (Persone)	SommerburgOlaf SiemsWerner KraemerKlaus <1960->
Disciplina	615.328
Soggetti	Carotenoids Vitamin A
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; Contents; Preface; Series Preface; Editors; Contributors; Chapter 1 - Hepatic Retinoid Metabolism: What Is Known and What Is Not; Chapter 2 - Metabolism of Vitamin A in White Adipose Tissue and Obesity; Chapter 3 - Retinoids in the Treatment of Psoriasis; Chapter 4 - Age-Related Macular Degeneration and Carotenoids; Chapter 5 - Lutein, Zeaxanthin, and Vision across the Life Span; Chapter 6 - Assuring Vitamin A Adequacy to Prevent Eye and Ear Disorders; Chapter 7 - Disturbed Accumulation and Abnormal Distribution of Macular Pigment in Retinal Disorders Chapter 8 - Retinol and Otitis MediaChapter 9 - Carotenoids and Mutagenesis; Chapter 10 - Carotenoids and Vitamin A in Lung Cancer Prevention; Chapter 11 - Is the Effect of -Carotene on Prostate Cancer Cells Dependent on Their Androgen Sensitivity?; Chapter 12 - Carotenoid Intake and Supplementation in Cancer: Pro and Con; Chapter 13 - Vitamin A in Lung Development and Function; Chapter 14 - Vitamin A and Carotenoids in Lung Diseases; Chapter 15 - Chemopreventive Effects of Astaxanthin on Inflammatory Bowel Disease and Inflammation-Related Colon Carcinogenesis Chapter 16 - Carotenoids in Laboratory MedicineChapter 17 - Supply

of Vitamin A in Developing Countries; Chapter 18 - Vitamin A Intakes Are Below Recommendations in a Significant Proportion of the Population in the Western World; Chapter 19 - Critical Appraisal of Vitamin A Supplementation Program in India; Chapter 20 - Consequences of Common Genetic Variations on β -Carotene Cleavage for Vitamin A Supply; Back Cover

Sommario/riassunto

Vitamin A (retinol) is an essential dietary compound with myriad metabolic and regulatory functions. Deficiency can result in vision problems, compromised immune responses, and a host of other medical issues. More than 600 carotenoids have been identified in plants, algae, fungi, and bacteria, and around 50 carotenoids-including β -carotene-can be converted into vitamin A. Carotenoids and Vitamin A in Translational Medicine reviews the medical use of carotenoids and vitamin A in cancer; diseases of the skin, eye, ear, and lung; and inflammatory bowel and metabolic diseases
