Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	An overview -- Teacher modeling: "out of our comfort zones!" -- Designing the invitation-to-risk environment -- Curriculum for the 21st century -- Conducting pre-assessments: sitting by the judge -- Formative assessments: gathering a "wealth of information" -- From statements to good questions in kindergarten -- "My inquiry skills shot through the roof!": grade 6 -- How "STEM" changed my life!" -- From cookie cutter a to self-directed student -- Inquiry begins at home -- After action reviews: how to build upon what we know.
Sommario/riassunto	How do we measure students' inquiry, problem-solving, and critical thinking abilities so that we know they are prepared to meet the challenges of the 21st century? John Barell explains how inquiry leads to problem-solving and provides specific steps for pre, formative and summative assessment that informs instruction of 21st century skills. Included are examples that show how to use today's technology in the classroom and how to use inquiry to develop and assess students' abilities.
