

1. Record Nr.	UNINA9910786265403321
Titolo	Healable polymer systems [[electronic resource] /] / edited by Wayne Hayes and Barnaby W. Greenland
Pubbl/distr/stampa	Cambridge, : Royal Society of Chemistry, 2013
ISBN	1-84973-747-9
Descrizione fisica	1 online resource (167 p.)
Collana	RSC Polymer Chemistry Series ; ; 5
Altri autori (Persone)	HayesWayne GreenlandBarnaby W
Disciplina	620.192
Soggetti	Polymers - Deterioration Polymers - Biodegradation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	Polymers are used in many everyday technologies and their degradation due to environmental exposure has lead to great interest in materials which can heal and repair themselves. In order to design new self healing polymers it's important to understand the fundamental healing mechanisms behind the material. Healable Polymer Systems will outline the key concepts and mechanisms underpinning the design and processing of healable polymers, and indicate potential directions for progress in the future development and applications of these fascinating and potentially valuable materials. The book cover
