Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- Foreword -- Preface -- Acknowledgments -- 1. Introduction: A Legacy of Neglect -- 2. From Personal Tragedy to Public Health Crisis -- 3. Peeling the Onion -- 4. The Contentious Meaning of Low-Level Exposures -- 5. The Rise of Public Health Pragmatism -- 6. Controlled Poison -- 7. Research on Trial -- 8. Lead Poisoning and the Courts -- 9. A Plague on All Our Houses -- Notes -- Index
Sommario/riassunto	In this incisive examination of lead poisoning during the past half century, Gerald Markowitz and David Rosner focus on one of the most contentious and bitter battles in the history of public health. Lead Wars details how the nature of the epidemic has changed and highlights the dilemmas public health agencies face today in terms of prevention strategies and chronic illness linked to low levels of toxic exposure. The authors use the opinion by Maryland's Court of Appeals-which considered whether researchers at Johns Hopkins University's prestigious Kennedy Krieger Institute (KKI) engaged in unethical research on 108 African-American children-as a springboard to ask fundamental questions about the practice and future of public health. Lead Wars chronicles the obstacles faced by public health workers in the conservative, pro-business, anti-regulatory climate that took off in

the Reagan years and that stymied efforts to eliminate lead from the environments and the bodies of American children.
