Sommario/riassunto	Indigenous communities are typically those that challenge the laws of the nation states of which they have become-often very reluctantly-a part. Around the world, community policing has emerged in many of these regions as a product of their physical environments and cultures. Through a series of case studies, Community Policing in Indigenous Communities explores how these often deeply divided societies operate under the community policing paradigm. Drawing on the local expertise of policing practitioners and researchers across the globe, the book explores several themes with regard to each region.
