

1. Record Nr.	UNINA9910786286203321
Titolo	The behavioral and cognitive neurology of stroke // edited by Olivier Godefroy [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2013
ISBN	1-107-23509-X 1-107-30136-X 1-107-30246-3 1-107-30558-6 1-107-30645-0 1-139-05898-3 1-107-30865-8 1-107-31200-0 1-299-00896-8 1-107-31420-8
Edizione	[Second edition.]
Descrizione fisica	1 online resource (xi, 442 pages) : digital, PDF file(s)
Collana	Cambridge medicine
Disciplina	616.8/1
Soggetti	Cerebrovascular disease Neuropsychiatry Cognitive neuroscience
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Vascular cognitive impairment -- pt. 2. Analytic approach : the behavioral and cognitive neurology of stroke -- pt. 3. Dementia and management of vascular cognitive impairment.
Sommario/riassunto	The ever-improving emergency care of those who have suffered serious cerebrovascular disease has shifted the treatment objective towards helping sufferers regain independence - meaning that there is an increased need to understand, manage and treat the residual deficits. The Behavioral and Cognitive Neurology of Stroke focuses on the diagnosis and management of behavioral and cognitive problems in patients with cerebrovascular disease. Written to be practical for clinical use, the book contains diagnosis and management strategies for all

disorders observed in stroke patients, including acute and later problems, and aiming to minimize long-term disability. All important information related to each disorder is summarized in key-point tables. Fully updated throughout and containing five new chapters, this new edition brings the book up to date with the major advances of the last five years. This book will be of value to all clinicians caring for stroke patients, neuroscientists, neuropsychologists, neurorehabilitationists and a wide range of therapists.
