Tall buildings in Vancouver: celebrating the "cult of the view"; 12. Conclusions; Notes; References; Index
Sommario/riassunto	In a time of recession, the challenge of building and planning for tall buildings has become even more complex; the economics of development, legislative and planning frameworks, and the local politics of development must be navigated by those wishing to design

and construct new tall buildings which fit within the fabric of their host cities. This book is a timely contribution to the debate about new tall buildings and their role and effect on our cities. It is divided into two main parts. In part one, the relationship between tall buildings and planning is outlined, followed by an e
