

1. Record Nr.	UNINA9910786323503321
Titolo	Hypertension [[electronic resource] /] / [edited by] George Bakris, Ragavendra R. Baliga
Pubbl/distr/stampa	Oxford, : Oxford University Press, 2012
ISBN	1-283-83559-2 0-19-987712-2
Descrizione fisica	1 online resource (188 p.)
Collana	Oxford American cardiology library
Altri autori (Persone)	BakrisGeorge L. <1952-> BaligaR. R
Disciplina	616.132
Soggetti	Hypertension
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Impact of high BP on cardiovascular risk and benefits of lowering BP -- Diagnosing hypertension -- Approach to hypertension : laboratory and diagnostic procedures -- Treatment -- Managing co-morbidities -- Special populations -- Improving hypertension control -- Public health challenges and community programs.
Sommario/riassunto	Over 75 million American adults suffer from hypertension, the leading risk factor for stroke and cardiovascular disease. Individuals who are normotensive at age 55 have a 90% lifetime risk for developing high blood pressure. Despite increased awareness in the past decades, about a third of adults with hypertension are not aware of their condition. With the growing prevalence of obesity, hypertension will continue to affect more individuals and, along with diabetes, will become the primary cause of cardiovascular morbidity and mortality. As part of the Oxford American Cardiology Library, this p
