National accounts  
Environmental impact charges  
Greenhouse gases  
Climatic changes  
United States

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; Foreword; Summary for Policymakers; 1. What Is the Best Policy Instrument for Reducing CO <sub>2</sub> Emissions?; 2. How to Design a Carbon Tax; 3. Emissions Pricing to Stabilize Global Climate; 4. The Social Cost of Carbon: Valuing Carbon Reductions in Policy Analysis; 5. Forest Carbon Sequestration; 6. Mitigation and Fuel Pricing in Developing Economies; 7. Fiscal Instruments for Climate Finance; 8. Carbon Pricing: Lessons Derived from Experience; Glossary of Technical Terms and Abbreviations; A; B; C; D; E; F; G; I; K; L; M; N; O; P; R; S; U; Contributors; Index; A; B; C; D; E; FG; H; I; K; L; M; N; O; P; R; S; T; U; V; W
Sommario/riassunto	Efforts to control atmospheric accumulations of greenhouse gases that threaten to heat up the planet are in their infancy. Although the IMF is not an environmental organization, environmental issues matter for its mission when they have major implications for macroeconomic performance and fiscal policy. Climate change clearly passes both these tests.
