

1. Record Nr.	UNINA9910786425903321
Autore	Ahouissoussi Nicolas
Titolo	Reducing the vulnerability of Azerbaijan's agricultural systems to climate change : impact assessment and adaptation options // Nicolas Ahouissoussi, James E. Neumann, Cuneyt Okan, Brent B. Boehlert, and Kenneth M. Strzepek
Pubbl/distr/stampa	Washington, DC : , : World Bank, , 2014
ISBN	1-4648-0185-1
Descrizione fisica	1 online resource (pages cm)
Collana	World Bank studies
Disciplina	632/.1094754
Soggetti	Crops and climate - Azerbaijan Climatic changes - Risk management - Azerbaijan Agriculture - Environmental aspects - Azerbaijan Agriculture and state - Azerbaijan
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; Contents; Foreword; Preface; Acknowledgments; About the Authors; Abbreviations; Executive Summary; Introduction; Key Climate Change Challenges for Azerbaijan's Agricultural Sector; Figures; Figure ES.1 Climate Change Risks and Recommended Adaptation Measures at the National Level; Figure ES.2 Climate Change Risks and Recommended Adaptation Measures for the Irrigated Agricultural Region; Maps; Map ES.1 Effect of Climate Change on Average Annual Temperature in the 2040s under the Low, Medium, and High Impact Climate Scenarios Map ES.2 Effect of Climate Change on Average Annual Precipitation in the 2040s under the Low, Medium, and High Impact Climate Scenarios Analysis of the Vulnerability of Azerbaijan's Agricultural Sector to Climate Change; Tables; Table ES.1 Effect of Climate Change on Crop Yields in the 2040s under the Medium Impact Climate Scenario (No Adaptation and No I; Figure ES.3 Estimated Effect of Climate Change on Mean Monthly Runoff Average in the 2040s; Figure ES.4 Effect of Climate Change on Irrigated Crop Yields Adjusted for Estimated Irrigation Water Deficits in the 2040s

Identifying a Menu of Adaptation Options Table ES.2. Summary of Key Climate Hazards, Impacts, and Adaptation Measures at the National and Agricultural Region Levels; Chapter 1 The Study: Design, Methodology, and Limitations; Overview of Approach; Figure 1.1 Flow chart of Phases of the Study; Map 1.1 Agricultural Regions of Azerbaijan; Boxes; Box 1.1 Developing a Range of Future Climate Change Scenarios for Azerbaijan; Methodology; Box 1.2 Description of Modeling Tools; Figure 1.2 Steps in Quantitative Modeling of Adaptation Options; Limitations; Note

Chapter 2 Overview of Agricultural Sector and Climate in Azerbaijan Overview of Azerbaijan's Agricultural Sector; Table 2.1 Value of Agricultural Products in Azerbaijan in 2010; Map 2.1 River Basins in Azerbaijan; Map 2.2 Irrigated Areas in Azerbaijan; Table 2.2 Size of Irrigated Areas in Azerbaijan's River Basins; Figure 2.1 Areas Planted by Crop in Azerbaijan, 2000-10; Exposure of Azerbaijan's Agricultural Systems to Climate Change; Table 2.3 Livestock Population by Agricultural Region

Map 2.3 Effect of Climate Change on Average Annual Temperature in the 2040s under the Low, Medium, and High Impact Climate Scenario

Map 2.4 Effect of Climate Change on Average Annual Precipitation in the 2040s under the Low, Medium, and High Impact Climate Scenario; Figure 2.2 Effect of Climate Change on Monthly Temperature and Precipitation Patterns for the Irrigated Agricultural Region (2040); Chapter 3 Impacts of Climate Change on Azerbaijan's Agricultural Sector; Impacts on Crops and Livestock Systems in Azerbaijan

Table 3.1 Effect of Climate Change on Crop Yields in the 2040s under the Medium Impact Scenario (No Adaptation and No Irrigation)

Sommario/riassunto

Agriculture is one of the most climate-sensitive of all economic sectors. Azerbaijan is one of the many countries where the majority of the rural population depends on agriculture—directly or indirectly—for their livelihood. Further, changes in climate and their impacts on agricultural systems and rural economies are already evident throughout Europe and Central Asia. The risks associated with climate change therefore pose an immediate and fundamental problem in the country. Adaptation measures now in use in Azerbaijan, largely piecemeal efforts, will be insufficient to prevent impacts on agri
