1.	Record Nr.	UNINA9910786510603321
	Autore	McMullen Curtis T.
	Titolo	Renormalization and 3-manifolds which fiber over the circle / / by Curtis T. McMullen
	Pubbl/distr/stampa	Princeton, New Jersey : , : Princeton University Press, , 1996 ©1996
	ISBN	0-691-01154-0 1-4008-6517-4
	Descrizione fisica	1 online resource (264 p.)
	Collana	Annals of Mathematics Studies ; ; Number 142
	Disciplina	514/.3
	Soggetti	Three-manifolds (Topology) Differentiable dynamical systems
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Front matter -- Contents -- 1 Introduction -- 2 Rigidity of hyperbolic manifolds -- 3 Three-manifolds which fiber over the circle -- 4 Quadratic maps and renormalization -- 5 Towers -- 6 Rigidity of towers -- 7 Fixed points of renormalization -- 8 Asymptotic structure in the Julia set -- 9 Geometric limits in dynamics -- 10 Conclusion -- Appendix A. Quasiconformal maps and flows -- Appendix B Visual extension -- Bibliography -- Index
	Sommario/riassunto	Many parallels between complex dynamics and hyperbolic geometry have emerged in the past decade. Building on work of Sullivan and Thurston, this book gives a unified treatment of the construction of fixed-points for renormalization and the construction of hyperbolic 3-manifolds fibering over the circle. Both subjects are studied via geometric limits and rigidity. This approach shows open hyperbolic manifolds are inflexible, and yields quantitative counterparts to Mostow rigidity. In complex dynamics, it motivates the construction of towers of quadratic-like maps, and leads to a quantitative proof of convergence of renormalization.
