Sommario/riassunto	Based on an insider's knowledge of weaponry and of actual Israeli and Egyptian battle strategies, this book examines how two of the strongest regional militaries would likely fight a high intensity war in the Middle East. The book examines how the various factors in play - the battle for air superiority, air-ground bombardment, armor, and infantry collisions - would shape the outcome of the conflict, discussing each factor separately in order to highlight its importance. The analysis draws on previous (mainly Arab-Israeli) conflicts, and also on the author's 20

years of experience in studying
