   ISBN   1-315-56811-X
                             1-317-17799-1
                             1-4724-3695-4

   Descrizione fisica   1 online resource (227 p.)

   Collana   Human Factors in Defence

   Disciplina   355.3/3041

   Soggetti   Command and control systems - Evaluation
                             Command and control systems - Research - Methodology

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references at the end of each chapters and
                             index.

   Nota di contenuto   Cover; Contents; List of Figures; List of Tables; List of Contributors;
                             Forewords; Preface; Acknowledgements; 1 Introduction; 2 Analysing
                             Tactical Cognitive Systems: Theories, Models and Methods; 3 Designing
                             Case Studies Using a Systems Analysis Approach; 4 Dynamic Measures
                             of Effectiveness in Command and Control; 5 Organizational Agility - An
                             Overview; 6 Characteristics of Command and Control in Response to
                             Emergencies and Disasters; 7 Empirical Studies of Command and
                             Control Centres at the Swedish Air Force; 8 The Advance of a Valid and
                             Reliable Tool for Assessing Shared Understanding
                             9 Evaluating the Effectiveness of an Armoured Brigade Staff10
                             Organizational Effectiveness at the Kosovo Force Headquarters: A Case
                             Study; 11 Agility in Command and Control - Functional Models of
                             Cognition; 12 Conclusions; Index

   Sommario/riassunto   Assessing Command and Control Effectiveness: Dealing with a
                             Changing World offers a description of the current state of Command
                             and Control (C2) research in imperfect settings, showing how a
                             research process should assess, analyse and communicate results to
                             the development cycle of methods, work, manning and C2-technology.

Special attention is given to the development of C2 research methods to meet the current and coming needs. The authors also look forward towards a future where effective assessment of C2 abilities are even more crucial, for instance in agile organisations.
