Sommario/riassunto	"A fascinating look at modern merc actions in the Middle East and Africa. From brushfire wars in the Congo to outright genocides in Biafra, highly skilled mercenaries were called upon to fight for order, and also for a living. Whether facing fanatics in Somalia or revolutionaries in Rhodesia, staving off cannibals in Sierra Leone or

assisting a civil war in Angola the mercs put their lives on the line for a cause." -- book cover.

Sommario/riassunto	"The 'nose art' that decorated WW2 aircraft has received considerable attention but the images and slogans that decorated land vehicles has been less widely appreciated. This visually stunning book displays many fine examples (original or faithfully recreated) of the art that adorned the military vehicles of both Allied and Axis forces. Both official unit markings, such as divisional badges and unit emblems, as well as decidedly less official renderings of pin up girls and cartoon characters are included. John Norris's concise but well researched text and extended captions set the artwork in context and explain the development of vehicle art through the course of the war and in the various armies. The result is a visual treat for the casual reader and a valuable reference for reenactors, vehicle restorers, wargamers and modelers."--
