Autore	Subacchi Paola <1962->
Titolo	The people's money : how China is building a global currency / / Paola Subacchi
Pubbl/distr/stampa	New York : , : Columbia University Press, , [2017] ©2017
ISBN	0-231-54326-3
Descrizione fisica	1 online resource (252 pages)
Disciplina	332.4/50951
Soggetti	Foreign exchange - China Renminbi Finance - China Monetary policy - China China Commerce
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Money is the game changer -- China's extraordinary, but still unfinished transformation -- A financially repressed economy -- China: a trading nation without an international currency -- Living with a 'dwarf' currency -- Creating an international currency -- Building a market for the renminbi -- The renminbi moves around (and goes beyond the offshore market) -- The road to reforms -- The age of Chinese money.
Sommario/riassunto	Many of the world's major economies boast dominant international currencies. Not so for China. Its renminbi has lagged far behind the pound, the euro, and the dollar in global circulation--and for good reason. China has long privileged economic policies that have fueled development at the expense of the renminbi's growth, and it has become clear that the underpowered currency is threatening China's future. The nation's leaders now face the daunting task of strengthening the currency without losing control of the nation's economy or risking total collapse. How are they approaching this challenge? In <i>The People's Money</i> , Paola Subacchi introduces readers to China's monetary system, mapping its evolution over the past century

and, particularly, its transformation since Deng Xiaoping took power in 1978. Subacchi revisits the policies that fostered the country's economic rise while at the same time purposefully creating a currency of little use beyond China's borders. She shows the key to understanding China's economic predicament lies in past and future strategies for the renminbi. The financial turbulence following the global crisis of 2008, coupled with China's ambitions as a global creditor and chief economic power, has forced the nation to reckon with the limited international circulation of the renminbi. Increasing the currency's reach will play a major role in securing China's future.

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface.- Cancer Metastasis: Tracking and Attacking a Moving Target. - The generation, detection, and prevention of genomic instability during cancer progression and metastasis.- DNA damage response pathways in cancer predisposition and progression.- Mathematical modeling for DNA repair, carcinogenesis and cancer detection.- Animal models of metastasis.- Microenvironmental Control Of Metastatic Progression.- 7 Mechanotransduction, metastasis and genomic instability -- 8 Immunomodulation and Genomic Instability -- 9 Synthetic Genetic Approaches in Colorectal Cancer: Exploiting and Targeting Genome Instability -- Nanomedicine – Nanoparticles in Cancer Imaging and Therapy -- Index.
Sommario/riassunto	Metastasis is the primary cause of mortality associated with cancer, and tumor genomic heterogeneity is a likely source for the cells that support cancer progression, resistance to therapy, and disease relapse. This book connects cancer metastasis with genomic instability in a comprehensive manner. Section 1 outlines the fundamental mechanisms responsible for these cellular and tissue phenotypes. Section 2 discusses <i>in silico</i> , <i>in vitro</i> , and <i>in vivo</i> models used for the experimental study of these processes. Section 3 reviews emerging themes (ex., microenvironment, mechanotransduction, and immunomodulation), and Section 4 highlights new therapeutic approaches to overcome the unique challenges presented by the heterogeneous and metastatic tumor. This book is intended for undergraduates and postgraduates with an interest in the areas of medicine, oncology, and cancer biology as well as for the content expert searching for thorough reviews of current knowledge in these areas.
