name? : the case of the Saola / C. Michele Thompson -- Epilogue :
property, state and society in Vietnam and beyond / Thomas Sikor.

Sommario/riassunto

"Lively debates around property, access to resources, legal rights and the protection of livelihoods have unfolded in Vietnam since the economic reforms of 1986. Known as Doi Moi (changing to the new), these have gradually transformed the country from a socialist state to a society in which a communist party presides over a neoliberal economy. By exploring the complex relationship between property, the state, society and the market, this book demonstrates how both developmental issues and state-society relations in Vietnam can be explored through the prism of property relations and property rights. The essays in this collection demonstrate how negotiations over property are deeply enmeshed with dynamics of state formation, and covers debates over the role of the state and its relationship to various levels of society, the intrusion of global forces into the lives of marginalized communities and individuals, and how community norms and standards shape and reshape national policy and laws"--Provided by publisher.
