

1. Record Nr.	UNINA9910786620403321
Titolo	Assessing middle ear function in infants // edited by Joseph Kei and Fei Zhao ; contributors, M. Patrick Feeney [and eight others]
Pubbl/distr/stampa	San Diego, California ; ; Abingdon, England : , : Plural Publishing, Inc., , 2012 ©2012
ISBN	1-59756-624-1
Descrizione fisica	1 online resource (209 p.)
Disciplina	617.80754
Soggetti	Audiometry, Impedance Middle ear - Physiology Newborn infants - Medical examinations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Contents; Foreword; Preface; Chapter 1: Anatomy and Physiology of the Outer and Middle Ear in Young Infants; Chapter 2: Measuring Middle Ear Function in Young Infants: An Overview; Chapter 3: High-Frequency (1000 Hz) Tympanometry: Clinical Applications; Chapter 4: Acoustic Stapedial Reflexes: Clinical Applications; Chapter 5: Assessing Middle Ear Function in Humans Using Multifrequency Tympanometry: An Overview; Chapter 6: Current Developments in the Clinical Application of the Sweep Frequency Impedance (SFI) in Assessing Middle Ear Dysfunction Chapter 7: Application of Wideband Acoustic Transfer Functions to the Assessment of the Infant Ear Chapter 8: The Challenge of Assessing Middle Ear Function in Young Infants: Summary and Future Directions; Index
Sommario/riassunto	This unique book provides an up-to-date reference source for university students, clinicians, researchers and policymakers concerned with the field of middle ear assessment. By drawing on the knowledge and expertise of experts from various countries, not only at the research level but also at the clinical level, this text represents as the only book that details the entire collection of audiological tests of

middle ear function for young infants.
