Shimin, New Civic Movements, and the Politics of Proposal -- Conclusion: The Shimin Idea and Civil Society -- Notes -- Bibliography -- Index
Sommario/riassunto	Making Japanese Citizens is an expansive history of the activists, intellectuals, and movements that played a crucial role in shaping civil society and civic thought throughout the broad sweep of Japan's postwar period. Weaving his analysis around the concept of shimin (citizen), Simon Avenell traces the development of a new vision of citizenship based on political participation, self-reliance, popular nationalism, and commitment to daily life. He traces civic activism through six phases: the cultural associations of the 1940's and 1950's, the massive U.S.-Japan Security Treaty protests of 1960, the anti-Vietnam War movement, the antipollution and antidevelopment

protests of the 1960's and 1970's, movements for local government reform and the rise of new civic groups from the mid-1970's. This rich portrayal of activists and their ideas illuminates questions of democracy, citizenship, and political participation both in contemporary Japan and in other industrialized nations more generally.
