

1. Record Nr.	UNINA9910786723303321
Autore	Kaplowitz Neil
Titolo	Drug-induced liver disease // edited by Neil Kaplowitz, MD, Professor of Medicine and Director, Research Center for Liver Diseases, Chief, Division of GI-Liver, Keck School of Medicine of the University of Southern California, Los Angeles, CA, USA, Laurie D. DeLeve, MD, PhD, Professor of Medicine, Division of Gastrointestinal and Liver Diseases, Keck School of Medicine of the University of Southern California, Los Angeles, CA, USA
Pubbl/distr/stampa	London, : Elsevier, 2013 London : , : Academic Press, , 2013
ISBN	0-12-387818-7
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (xxiv, 746 pages) : illustrations (some color)
Collana	Gale eBooks
Disciplina	616.3/6
Soggetti	Hepatotoxicology Liver - Effect of drugs on Drugs - Side effects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Mechanisms of liver injury -- pt. 2. Diagnosis and management -- pt. 3. Hepatotoxicity of specific drugs -- pt. 4. Future directions.
Sommario/riassunto	This field has shown tremendous growth in recent years, primarily due to the recognition that drug-induced liver disease is the most common cause of liver failure and one of the major contributors to the withdrawal of drugs developed by the pharmaceutical industry. Drug-Induced Liver Disease, 3rd edition is a comprehensive reference that covers mechanisms of injury, diagnosis and management, major hepatotoxins, regulatory perspectives and much more. Written by highly respected authorities, this new edition is an updated and definitive reference for clinicians and scientists in ac
