Sommario/riassunto

Islam and Peacemaking in the Middle East begins with a set of provocative questions: How, for example, do Muslims conceive of peace? To what degree do differences in the interpretation of Islam affect the ways in which peace is sought in the contemporary Middle East? Through analysis of regional trends and case studies, the authors explore various Islamic ideas of peace and their bearing on difficult ethnic, nationalist, and civic conflicts. The result widens the parameters for serious discussion of Islam's contributions—real and potential—to ongoing negotiations.

Sommario/riassunto

Imperialism and Biblical Prophecy is a radically new interpretation of prophetic poetry. Using more than thirty new translations from the Hebrew Bible, it shows that this poetry is inseparable from imperialism, that each of the three major waves of biblical prophecy which have survived in the Old Testament occurred in response to simultaneous waves of imperialist conquest.
